

CCNA Chapter 10 - Subnetting Part 2

Decimal/Binary conversion using 128 64 32 16 8 4 2 1.

Networks= $2^{\text{borrowed bits}}$.

Hosts= $2^{\text{(host bits)}}-2$.

Block Size=256-interesting octet.

Example /26 => 255.255.255.192, Hosts=62, Block=64.

Subnet Table:

192.168.1.0 -> 1-62, BC 63

192.168.1.64 -> 65-126, BC 127

192.168.1.128 -> 129-190, BC 191

192.168.1.192 -> 193-254, BC 255 (corrected).
