

CCNA 200-301 - Chapter 11: Subnetting Part 3 (Class B)

Topics covered:

- Class B subnetting.
- /17 (255.255.128.0).
- Convert mask to binary.
- $\text{Networks} = 2^{(\text{Borrowed Bits})}$.
- $\text{Hosts} = 2^{(\text{Total Host Bits})} - 2$ (count ALL zero bits).
- Hop = 256 - Interesting Octet.
- Build Network ID / First Host / Last Host / Broadcast table.
- Packet Tracer lab: verify ping inside subnet; routing required between subnets.
- CIDR notation and professional writing (/17, /24, /26).
