

CCNA 200-301 - Chapter 19

EIGRP Protocol Summary

1. Overview

- EIGRP = Enhanced Interior Gateway Routing Protocol.
- Hybrid Dynamic Routing Protocol.
- Supports VLSM (Classless).
- Fast Convergence.
- Important for interviews although removed from the latest CCNA exam.

2. Key Facts

Item	Value
Type	Hybrid
Administrative Distance	90
Multicast	224.0.0.10
Metric	Bandwidth + Delay + Reliability
AS Number	1 - 65535
Supports	VLSM

3. Fast Convergence

Keeps a backup route and switches almost instantly when the primary path fails.

4. Autonomous System (AS)

All routers must use the same AS number to become neighbors and exchange routing information.

5. Configuration Commands

- enable
- configure terminal
- router eigrp 1
- network 192.168.1.0
- network 11.0.0.0
- network 12.0.0.0

6. Verification Commands

- show ip route
- show ip protocols
- show ip eigrp neighbors
- show ip eigrp topology

7. Exam Notes

- AD = 90
- Multicast = 224.0.0.10
- Metric = Bandwidth + Delay + Reliability
- Same AS on all routers
- Advertise only directly connected networks.
